Call for Participation

The Western Canadian Conference on Computing Education (WCCCE) 2018
May 4 & 5, 2018, University of Victoria, Canada
http://www.cs.uvic.ca/wccce2018

The organizers of WCCCE 2018 welcome tutorial/workshop proposals (i.e., up to 90 minutes), for papers, and for panel proposals on the following (non-exhaustive) list of topics:

- Post-secondary programs and curricula for computing
- New or experimental computing-education curricula at any level
- Teaching methods or tools for specific concepts or courses
- Materials for specific concepts or courses
- General methods and tools for computer-related courses
- Methods, tools and effective structures of designing and teaching computer labs
- Applications and techniques to support distance and/or distributed learning
- Multimedia applications for computer education

Submissions are welcome in the form of:
- Experience reports
- New curricula and program-development descriptions
- CS education research

WCCCE 2018 will take place on May 4th and 5th, 2018 at the University of Victoria in Victoria, British Columbia, Canada.

The event is presented in cooperation with the ACM Special Interest Group on Computer Science Education (SIGCSE).

Keynote speaker: Michelle Craig (University of Toronto)

For over 20 years the Western Canadian Conference on Computing Education has been a forum for disseminating experience and information pertaining to the development and delivery of programs and courses in computer science, computer technology, or information systems, broadly defined. The conference's purpose is to bring together university and college educators along with industrial partners and government officials who have an interest in the instruction and delivery of computer related course and the development and evolution of computing education.

Participation can take the form of:

- A tutorial or workshop proposal of up to three hours of instruction.
- A full length paper, not more than 6 pages, for inclusion in the conference proceedings and presentation during our paper sessions.
- A short one- or two- page description on a topic/idea for presentation in one of our short presentation sessions.

Therefore if you are effectively using unique methods to teach a computer related topic, have successfully adopted, or developed, a new tool or technology in your computer related courses or labs, this is an opportunity to tell people about it. Or maybe, you have tried something and it doesn't work. People will still be interested tell people about it so they don't make the same mistakes. If you have developed a tool that improves instruction quality for your courses, this is the place to demonstrate it. Even if you have tried methods or tools in your instruction with little success, we are still eager to hear about it. Your experience can help us all.

The deadline for submissions is March 21, 2018.

For more information, including instructions on how to submit, please visit the conference website ([http://www.cs.uvic.ca/wccce2018)](http://www.cs.uvic.ca/wccce2018).
